

Are YOU Concerned About Child Predators?

Have YOUR Child Experience Our Steal Proof Master Program!

They Will Learn How to Deal with Child Predators Effectively
So That YOUR Child Will NEVER Be a Victim

Instructor Jared Berman coaches a student on stranger danger.

Steal Proof Masters is for children ages 5-12 and is based on the conclusion that children retain information much better when they are excited and interested in the subject. Adventures in Safety created the Steal Proof Masters program utilizing a fantasy adventure theme that interests and intrigues children into learning. It is a program that teaches children that their brain is their best weapon, not their hands. It is a program that challenges them to become "Steal Proof Masters" and to learn about the characters that are symbolic of the ten most common lures used by child predators. This program allows children a way recognize dangerous situations and communicate freely with trusted adults.

This Stranger Danger educational adventure takes children on a journey where a wizard and his two apprentices introduce the children to the Ten Evil Warriors (lures). Children are taught to recognize the tricks used by child predators that want only to cause them harm. This exciting and fun, yet powerful program is backed by a 40 minute fantasy adventure video, Journey of the Steal Proof Master that is a self educating course in itself. The video educates while it entertains.

"I highly recommend this program to all students at the elementary level."
Carol McGrath Esten Elementary School Principal, Rockland, MA
